All Houses, All Buyers Index (1983=100)

Index (seasonally adjusted) Monthly Change -1.3% Annual Change -0.9%

Standardised Average Price (seasonally adjusted) £189,027

Key Points

- House prices fell by 1.3% in April. Prices were 0.9% lower on an annual basis.
- We expect a mid single digit percentage decline in UK house prices this year. There are regional variations, however. Some areas of the country, such as Scotland, are likely to see modest price rises whilst other parts (e.g. Wales and West Midlands) are expected to see a decline above the national average.
- Price falls should be viewed in the context of the substantial price rises over recent years: prices nearly doubled (190%) over the ten years to August 2007. The average UK price rose to more than £130,000 between August 1997 and August 2007.
- The decline in prices is driven by a squeeze on spending power and the rapid rise in interest rates in the last few years. These factors have curbed housing demand. The rise in interest rates between August 2006 and July 2007 has increased average mortgage costs. A decline in earnings over the past year has also constrained housing demand.
- A growing - albeit slowing - economy, high employment levels, low interest rates and a shortage of new homes underpin housing valuations. The economy grew at an annual rate of 2.5% in Q1; in line with the long-term average. Employment increased by 152,000 in the three months to February compared with the preceding quarter and stands at a record high 29.5 million.
- More Bank of England interest rate cuts are expected over the coming months as signs of an expected economic slowdown accumulate. This evidence will help to allay the MPC's concerns regarding inflation over the medium term, providing scope to reduce rates.
- This month we look at housing transaction levels as part of our occasional series on key market developments. Transaction levels in recent years – averaging 1.16 million a year during 2007 – have been much lower than during previous cycles (1.7 million in 1988).

Commenting, Martin Ellis, chief economist, said:

"House prices fell by 1.3% in April. We expect a mid single digit percentage decline in UK house prices this year. There will be regional variations, however. Some areas of the country are likely to record modest price rises whilst other parts are expected to see falls above the national average.

Price falls should be viewed in the context of the substantial price rises over recent years. UK prices nearly doubled 190% over the ten years to August 2007. A growing economy, high employment levels, low interest rates and a shortage of new homes underpin housing valuations."

Pressures on householders' income curb housing demand

The decline in prices is driven by a squeeze on spending power and the rapid rise in house prices in the last few years. These factors have curbed housing demand. The rise in interest rates between August 2006 and July 2007 has increased average mortgage costs.

There has been a modest decline in 'real' earnings over the past year. Average earnings rose by 3.7% in the year to February, below the 4.1% increase in the headline rate of retail price inflation over the same period. Sharp increases in both fuel (4%) and food prices (6%) over the past year have helped to reduce the discretionary income available to households to fund house purchase.

Housing market activity is significantly lower than a year ago

Completed property sales in March were down 20% on an annual basis. The number of new buyers interested in home purchase fell for the sixteenth successive month in March, highlighting the decline in housing demand. (Source: RICS)

The number of mortgages approved to finance house purchase – a good leading indicator of house sales – in Q1 2008 was 41% lower than a year earlier.

High employment and low interest rates support house prices

A growing economy, high employment levels, low interest rates and a shortage of new homes underpin housing valuations. The economy expanded at an annual rate of 2.5% in 2008 Q1; in line with the UK's long-term average. The quarterly rate of growth, however, did slow from 0.6% in 2007 Q4 to 0.4% in 2008 Q1.

Employment increased by 152,000 in the three months to February compared with the preceding quarter and was 456,000 higher than a year earlier. The total number of people in employment stands at a record high 29.5 million.

The UK economy is forecast to slow during the course of 2008, recording below trend growth for the first time since 2005. We expect there to be a modest rise in unemployment later in the year due to this easing in growth. The scale of the increase in unemployment is unlikely to cause widespread difficulties for households.

MPC to lower rates further during the next few months

More Bank of England interest rate cuts are expected over the coming months as concrete evidence of an economic slowdown accumulates. This evidence will help to allay the MPC's concerns regarding inflation over the medium term, providing scope to lower rates. The MPC is nonetheless expected to maintain a "gradualist" monetary policy stance, lowering rates at a steady pace.

HOUSING TRANSACTIONS

The number of housing transactions in recent years has been significantly lower than at the height of the late 1980s housing boom

There were 1.17 million house sales in England & Wales in 2007 and an average of 1.16 million in the last three years (2005-2007). This is nearly a third lower than in 1988 when there were an estimated 1.7 million transactions.

Transactions have also been significantly lower as a proportion of the housing stock in recent years; averaging 7% during 2005-2007 compared to 12% between 1986 and 1988.

The number of first time buyers (FTBs) has also fallen sharply in recent years

An estimated 300,000 FTBs entered the market in 2007, the lowest since 1980. This compares with an estimated 900,000 at the peak in 1988. FTBs have also declined sharply as a proportion of all borrowers taking out a new mortgage to finance house purchase, accounting for 30% in 2007 compared to 51-52% in 1989 and 1990. (FTBs accounted for 14% of all new mortgages (i.e. including remortgages) in 2007 against 45% in 1993 (the earliest available data on this basis).)

Buyers have been putting down bigger deposits than in previous cycles

The average deposit put down by FTBs in 2007 (£34,381) represented 20% of the purchaser price compared with 12% in 1989.

Notes to the Forms

(i) This form is to be sent to the issuer or underlying issuer and to be filed with the competent authority.

(ii) Either the full name of the legal entity or another method for identifying the issuer or underlying issuer, provided it is reliable and accurate.

(iii) This should be the full name of (a) the shareholder; (b) the person acquiring, disposing of or exercising voting rights in the cases provided for in DTR5.2.1 (b) to (h); (c) all the parties to the agreement referred to in DTR5.2.1 (a), or (d) the direct or indirect holder of financial instruments entitled to acquire shares already issued to which voting rights are attached, as appropriate.

In relation to the transactions referred to in points DTR5.2.1 (b) to (h), the following list is provided as indication of the persons who should be mentioned:

- in the circumstances foreseen in DTR5.2.1 (b), the person that acquires the voting rights and is entitled to exercise them under the agreement and the natural person or legal entity who is transferring temporarily for consideration the voting rights;

- in the circumstances foreseen in DTR 5.2.1 (c), the person holding the collateral, provided the person or entity controls the voting rights and declares its intention of exercising them, and person lodging the collateral under these conditions;

- in the circumstances foreseen in DTR5.2.1(d), the person who has a life interest in shares if that person is entitled to exercise the voting rights attached to the shares and the person who is disposing of the voting rights when the life interest is created;

- in the circumstances foreseen in DTR5.2.1 (e), the parent undertaking and, provided it has a notification duty at an individual level under DTR 5.1, under DTR5.2.1 (a) to (d) or under a combination of any of those situations, the controlled undertaking;

- in the circumstances foreseen in DTR5.2.1 (f), the deposit taker of the shares, if he can exercise the voting rights attached to the shares deposited with him at his discretion, and the depositor of the shares allowing the deposit taker to exercise the voting rights at his discretion;

- in the circumstances foreseen in DTR5.2.1 (g), the person that controls the voting rights;

- in the circumstances foreseen in DTR5.2.1 (h), the proxy holder, if he can exercise the voting rights at his discretion, and the shareholder who has given his proxy to the proxy holder allowing the latter to exercise the voting rights at his discretion.

(iv) Applicable in the cases provided for in DTR 5.2.1 (b) to (h). This should

(v) The date of the transaction should normally be, in the case of an on exchange transaction, the date on which the matching of orders occurs; in the case of an off exchange transaction, date of the entering into an agreement.

The date on which threshold is crossed should normally be the date on which the acquisition, disposal or possibility to exercise voting rights takes effect (see DTR 5.1.1R (3)). For passive crossings, the date when the corporate event took effect.

(vi) Please refer to the situation disclosed in the previous notification, In case the situation previous to the triggering transaction was below 3%, please state 'below 3%'.

(vii) If the holding has fallen below the minimum threshold , the notifying party should not be obliged to disclose the extent of the holding, only that the new holding is less than 3%.

For the case provided for in DTR5.2.1(a), there should be no disclosure of individual holdings per party to the agreement unless a party individually crosses or reaches an Article 9 threshold. This applies upon entering into, introducing changes to or terminating an agreement.

(viii) Direct and indirect

(ix) In case of combined holdings of shares with voting rights attached 'direct holding' and voting rights 'indirect holdings', please split the voting rights number and percentage into the direct and indirect columns-if there is no combined holdings, please leave the relevant box blank.

(x) Voting rights to shares in respect of which the notifying party is a direct shareholder (DTR 5.1)

(xi) Voting rights held by the notifying party as an indirect shareholder (DTR 5.2.1)

(xii) If the holding has fallen below the minimum threshold, the notifying party should not be obliged to disclose the extent of the holding, only that the new holding is below 3%.

(xiii) date of maturity / expiration of the financial instrument i.e. the date when the right to acquire shares ends.

(xiv) If the financial instrument has such a period-please specify the period-for example once every three months starting from the (date)

(xv) The notification should include the name(s) of the controlled undertakings through which the voting rights are held. The notification should also include the amount of voting rights and the percentage held by each controlled undertaking, insofar as individually the controlled undertaking holds 5% or more, and insofar as the notification by the parent undertaking is intended to cover the notification obligations of the controlled undertaking.

(xvi) This annex is only to be filed with the competent authority.

(xvii) Whenever another person makes the notification on behalf of the shareholder or the natural person/legal entity referred to in DTR5.2 and DTR5.3

Halifax House Price Index

National Index

March 2008

All Houses, All Buyers Index (1983=100)

Index (seasonally adjusted) 620.0 Monthly Change -2.5% Annual Change 1.1%

Standardised Average Price (seasonally adjusted) £191,556

Key Points

- House prices fell by 2.5% in March. Prices in Quarter 1 were 1.0% lower than in 2007 Quarter 4. House prices in March were 1.1% higher than a year earlier.
- As expected, there was a mixed regional picture. The biggest rises were in Greater London (1.6%), East Anglia (1.4%) and East Midlands (2.2%). There were price falls in a number of regions with the biggest falls in West Midlands (-5.0%) and Wales (-4.7%).
- Overall, we expect there to be a modest (low single digit) decline in UK house prices this year. Any declines, however, should be viewed in the context of the significant price rises over recent years. UK prices have increased by 171% over the past ten years and by 51% over the last five years. The average UK price has risen by £120,860 during the past decade from £70,696 to £191,556.
- All 12 UK regions have experienced substantial house price rises over the last ten years, ranging from 146% in Scotland to 271% in Northern Ireland. Average prices increased by 191% in Greater London, 188% in Wales and 150% in West Midlands during the period.
- Sound economic fundamentals are supporting house prices. A strong labour market, low interest rates and a shortage of new houses underpin housing valuations. Employment is at a record high and unemployment continues to fall. Employment stands at 29.5 million and has risen by 370,000 over the past year. Unemployment is below 800,000 and has fallen by over 125,000 in the last year. We expect there to be a modest rise in unemployment later in the year, but the scale of the increase is unlikely to cause widespread difficulties for households.

Commenting, Martin Ellis, chief economist, said:

"House prices fell by 2.5% in March. Prices in 2008 Quarter 1 were 1.0% lower than in 2007 Quarter 4.

2120,000 during the past decade from 210,000 to 210,000, an increase of 11.1%.

Sound economic fundamentals are supporting house prices. A strong labour market, low interest rates and a shortage of new houses underpin housing valuations. Our research shows that the labour market is the key driver of the housing market. Employment is at a record high and unemployment continues to fall."

House prices increased in some regions during 2008 Q1

The biggest price rises were in Greater London (1.6%), East Anglia (1.4%) and East Midlands (2.2%). There were also gains in the North (1.2%) and Scotland (0.2%). Prices in the South East were unchanged.

Falls in other regions follow substantial gains in the past ten years

There were house price falls in six regions with the biggest falls in West Midlands (-5.0%) and Wales (-4.7%). These declines should be seen in the context of the substantial price rises recorded in these regions over the past ten years; West Midlands (150%) and Wales (188%).

There were also price declines in the South West (-2.6%), Northern Ireland (-1.5%), Yorkshire & the Humber (-0.5%) and the North West (-0.5%). These falls also follow strong gains in the past ten years.

Most regions have seen a rise in prices over the past year led by Scotland and Northern Ireland

Nine of the 12 regions of the UK have recorded an increase in house prices over the past year. The biggest rises have been in Scotland (5.3%) and Northern Ireland (3.5%). Three regions have experienced a modest fall in prices during the last 12 months: South West (-3.3%), West Midlands (-3.7%) and Wales (-5.3%).

Strong labour market underpins the housing market

The labour market is the key driver of the housing market. Employment is at a record high and unemployment continues to fall. Employment stands at 29.5 million and has risen by 370,000 over the past year. Unemployment is below 800,000 and has fallen by over 125,000 in the last year.

Homebuyers are in a stronger position than in the past

Buyers have been putting down bigger deposits than in previous cycles. 82% of all new borrowers put down a deposit of more than 10% of the house price during the final quarter of 2007. By contrast, 56% of new borrowers put down a deposit of more than 10% in 1989 and 1990.

The average deposit put down by a first-time buyer (FTB) in 2007 (£34,381) represented 20% of the purchaser price compared with 12% in 1989. Only 5% of FTBs took out a loan of 100% or more of the purchase price in 2007 compared with 35% in 1990.

More than a third (35%) of owner-occupiers in Britain own their home outright. (There are 11.8 millions households with a mortgage and 6.3 million households owning outright.) In addition, nearly one in four (25%) of properties bought each year are bought with cash.

Fewer FTBs and housing transactions in recent years

Total house sales have been much lower in the last few years compared with the height of the 1980s boom. There were, on average, 1.15 million transactions in England & Wales in the last three years (2005-2007). This was a third – 560,000 – lower than in 1988 when there were an estimated 1.71 million transactions.

FTBs also account for a significantly smaller proportion of new mortgage borrowers: 30% against nearly 50% in the late 1980s.

£4.0 Billion Rights Issue

Update on Capital, Current Trading, Treasury Portfolio and Outlook

29 April 2008

The Board of HBOS plc ("HBOS", the "Group" or "Company") announces a rights issue to raise £4.0 billion net of expenses to strengthen the HBOS capital base. The Board is also establishing a new target Tier 1 ratio of between 8.0% and 9.0% and a new target core Tier 1 ratio of between 6.0% and 7.0%. These actions build on the Group's existing capital position and achieve a step change in capital strength.

The enhanced capital position will enable the Group to underpin its competitive position in its core markets and to pursue its strategy of:

- consolidating leadership in residential mortgages and savings;
- delivering measured and selective high value Corporate growth;
- continuing to grow strongly in Insurance & Investment; and
- investing in targeted International growth.

These initiatives are being implemented against the backdrop of both the continuing financial market volatility and the more challenging UK macroeconomic environment.

Key highlights of today's announcement include:

- a fully underwritten rights issue to raise £4.0 billion, on the basis of 2 new ordinary shares for every 5 existing ordinary shares at 275 pence per share;
- a reduction in the dividend payout ratio to 40%;
- that the 2008 interim dividend is intended to be paid in shares with the 2008 final dividend intended to be paid in cash; and

Page 1

- negative fair value adjustments in the year to date of £970 million in the Trading Book (full year 2007: £227 million), and £1,874 million post tax in the Banking Book (full year 2007:

£509 million post tax). Banking Book fair value adjustments do not impact regulatory capital or reported profits.

Year to date, the trading performance of the Group has been satisfactory, despite the challenging conditions. Details are set out in the Trading Update (Appendix I).

Andy Hornby, Group Chief Executive, said:

"The actions we have announced today achieve a step change in our capital strength and our target ratios. This allows us to consolidate our competitive position in our core markets.

We are planning for a more challenging environment ahead and the proceeds of the rights issue should ensure that we benefit from strong ratios even if the macroeconomic environment deteriorates further. In the long term we remain optimistic about the fundamental prospects for our core businesses. The Group will be well positioned to benefit over time from a number of selective growth opportunities across our businesses where there will be scope to earn good returns.

We are focused on achieving returns on equity in the mid teens and are well placed to deliver long term sustainable growth."

£4.0 Billion Rights Issue

Update on Capital, Current Trading, Treasury Portfolio and Outlook

Introduction

The Board of HBOS announces a rights issue to raise £4.0 billion net of expenses, to strengthen the HBOS capital base. The Board is also establishing a new target Tier 1 ratio of between 8.0% and 9.0% and a new target core Tier 1 ratio of between 6.0% and 7.0%. Together these actions achieve a

step change in the Group's capital strength. These initiatives are being implemented both against the backdrop of continuing financial market volatility and the more challenging UK macroeconomic environment.

Despite these market conditions, the underlying trading performance of the Group in the year to date has been satisfactory. Performance relative to the same period in 2007 has been impacted by negative fair value adjustments to the trading book, higher LIBOR funding costs and lower revenues from the Corporate investment portfolio. Further details of the trading performance are set out in Appendix I.

Background to and Reasons for the Rights Issue

The Board of HBOS believes that a stronger capital base is appropriate in current market conditions. The four key objectives of the capital raising are:

- to rebase the Group to stronger capital ratios;
- to consolidate the Group's strengths in its core markets;
- to mitigate the increased sensitivity on our regulatory capital of change arising from Basel II; and
- to accommodate the impact of the Treasury portfolio fair value adjustments.

The rights issue of £4.0 billion should enable HBOS to operate between 8.0% and 9.0% for the Tier 1 ratio and between 6.0% and 7.0% for the core Tier 1 ratio.

The Board of HBOS believes that a strengthened capital base and the Group's new target ratios are prudent in the context of the challenges facing the financial services industry. Following the rights issue, the Group will be in a stronger position to accommodate the increased sensitivity of regulatory capital under Basel II. The new target ranges are also in line with stronger European banking peers.

The Board is optimistic about the fundamental prospects for the Group's core businesses. The enhanced capital position will enable the Group to pursue its strategy of:

- consolidating leadership in residential mortgages and savings;
- delivering measured and selective high value Corporate growth;
- continuing to grow strongly in Insurance & Investment; and
- investing in targeted International growth.

Page 3

The Treasury portfolio has experienced a number of fair value adjustments, some of which impact capital. HBOS expects these adjustments to reverse over time. The Treasury portfolio is described more fully in the section below.

Taking into account all of the above factors, the Board has determined that it is appropriate to raise £4.0 billion through the rights issue.

Rights Issue

The proposed rights issue will raise proceeds of £4.0 billion, net of expenses. Subject to the conditions to the rights issue being satisfied, it will be made on the basis of 2 new ordinary shares for every 5 existing ordinary shares at an issue price of 275 pence per HBOS share. This represents a

36% discount to the theoretical ex-rights price and a 45% discount to the closing price of HBOS shares of 495.75 pence per share on 28 April 2008, the last trading day before this announcement.

HBOS will seek approval from its shareholders in respect of the rights issue, and the proposed interim scrip dividend, at an Extraordinary General Meeting ("EGM") to be held in late June 2008. A prospectus in connection with the rights issue is expected to be published shortly before the EGM. The nil paid trading period is expected to commence shortly following the EGM and dealings in new fully paid shares are expected to commence in late July 2008. Dresdner Kleinwort Limited ("Dresdner Kleinwort") and Morgan Stanley & Co. International plc ("Morgan Stanley") are acting as joint sponsors and bookrunners to the rights issue and the rights issue is fully underwritten by Dresdner Bank AG, London Branch and Morgan Stanley.

Under the proposed rights issue, ordinary shareholders will be offered new ordinary shares at a price of 275 pence per share on the following basis:

2 new ordinary shares for every 5 existing such shares

registered in their name on the record date and so on in proportion to the number of existing such shares then held. Fractional entitlements will not be allotted to such shareholders but instead will be rounded down to the nearest whole number of new shares, with the aggregated fractional entitlements being sold for the benefit of the Company. The new ordinary shares will, when issued and fully paid, rank pari passu in all respects with the existing ordinary shares, including the right to receive all dividends or other distributions declared, made or paid after the date of their issue. For the avoidance of doubt, they will not be entitled to receive the 32.3 pence per share final dividend payable, subject to shareholder approval, in respect of the year ended 31 December 2007.

Page 4

The rights issue will be conditional, amongst other things, upon:

- the passing of the necessary resolutions at the EGM referred to above;
- the final date for acceptance and payment under the rights issue being no later than the back stop date of 7 August 2008 (or such later time and/or date as the Company, Dresdner Kleinwort and Morgan Stanley may agree); and
- the underwriting agreement relating to the rights issue between the Company, Dresdner Kleinwort, Dresdner Bank AG, London Branch and Morgan Stanley otherwise becoming unconditional and not having been terminated in accordance with its terms prior to Admission.

The Board considers that the terms of the rights issue and the passing of the necessary resolutions to be proposed at the EGM to be in the best interests of shareholders as a whole. Accordingly, the Board unanimously recommends to shareholders that they vote in favour of the resolutions, as the Directors intend to do in respect of their own beneficial holdings of ordinary shares.

Treasury Portfolio

As disclosed in the 2007 preliminary results announcement, Treasury holds a portfolio of high quality debt securities. In line with the significant deterioration in market conditions generally, the Group has made a number of fair value adjustments, relating primarily to its holdings of Asset Backed Securities ("ABS") and Floating Rate Notes. HBOS expects the adjustments to reverse over time. No impairments have been incurred in respect of these investments.

Negative fair value adjustments in the year to date are summarised as follows:

- Trading Book £970 million (full year 2007: £227 million);

The fair value adjustments in the Banking Book have no impact on reported profits or regulatory capital strength.

Treasury Portfolio Update

The following table provides a breakdown of the Group's debt securities in its Treasury portfolio:

	Banking Book		Trading	Total as at

Negative Fair Value Adjustments

The quality of our Treasury portfolio remains strong; there have been no credit impairments to date and the weighted average credit rating of our ABS portfolio is 1.08 (Dec 2007: 1.02). There is only a very small exposure to sub-prime assets.

HBOS believes that it has adopted a prudent basis for the valuation of its Treasury assets and has taken additional mark-downs for certain parts of its portfolio reflecting the illiquidity of the relevant markets. For example, the HBOS Alt-A portfolio, which has now been marked to 80p in the £, comprises overwhelmingly AAA rated securities with a weighted average LTV of 77%. This portfolio benefits from a weighted average 30% credit enhancement and has a weighted average FICO score of 708.

HBOS has credit exposure to monolines both through wrapped bonds and purchased CDS protection. The Group's current credit exposure, using the HBOS methodology, is £970 million (Dec 2007: £551 million). As at 31st March 2008, the nominal exposures were £2.8 billion of negative basis CDS and £2.3 billion of wrapped bonds. Of the negative basis CDS, 92% of the underlying bonds are AAA rated and 8% AA+ rated. Of the wrapped bonds, 85% are insured by AAA monolines and 15% are insured by FGIC, XLCA and CIFG and all of these bonds are externally rated A- or better. Overall, cumulative negative fair value adjustments in respect of wrapped bonds and CDS with monolines are £180 million pre-tax.

Dividend

The Board of HBOS believes that a dividend payout ratio of 40% is appropriate over the medium term. This payout ratio is below the 2007 payout ratio of 46% and reflects a prudent view of the expected ongoing capital requirements of the Group. In future years, the Board intends to pursue a progressive dividend policy, growing dividends in line with underlying earnings.

The Board believes that it would be prudent to pay the 2008 interim dividend in shares and, in that regard, intends to seek necessary shareholder approval at the EGM to be convened in connection with the rights issue. The current intention is, however, to pay the 2008 final dividend in cash.

The Board confirms that the 2007 final dividend of 32.3p, if approved by shareholders, will be paid in cash as previously announced.

Trading Update

This trading update constitutes the HBOS Interim Management Statement for the period from 31 December 2007 to 28 April 2008.

This announcement covers the information to be presented at the HBOS Annual General Meeting in Glasgow and discussed in a presentation for analysts and investors at 9am today.

Group Trading Overview

Trading conditions in the first quarter of the year have been challenging against the backdrop of global financial market dislocation that is now impacting on the wider economy.

On the back of a strong pipeline of business coming into the year, asset growth has been relatively strong in the first quarter. This has now moderated, with a full year expectation of a mid single digits level of growth. Competition for deposits has been strong but we expect to grow deposits at a faster rate than assets in the year.

We continue to fund successfully in global money markets and are not planning on the securitisation market re-opening this year. However, we expect to continue to access term wholesale markets and raised some £5.5 billion in the first quarter, including £750 million of innovative Tier 1 securities.

Following the rights issue, we expect to maintain strong Tier 1 ratios within a range of 8.0% to 9.0% and a core Tier 1 ratio of between 6.0% and 7.0%.

For the full year, we expect good growth in net interest income despite the current pressures on margins from higher funding costs, particularly the LIBOR spread over base rates. As previously guided, the margin decline in 2008 is likely to be lower than in the previous year. Longer term, the margin prognosis is more favourable. We look forward to relatively stable and potentially improving margins in 2009.

Other income will be significantly lower than in the previous year due to negative fair value adjustments to the Trading Book and lower revenues from the Corporate investment portfolio.

The full year rate of cost growth will be lower than in 2007, particularly in the second half of the year as we manage our cost base to suit the changing business environment.

Our expectation is that there will be some deterioration in the credit environment in 2008.

Divisional Trading

Retail

We continue to supply one in five new mortgages, but after allowing for principal repaid and a significant reduction in the net lending market we expect only modest asset growth this year. Despite pressure on funding costs, notably the LIBOR spread over base rate, we expect a broadly stable Retail net interest margin in 2008 and an improving margin in 2009. We remain cautious regarding unsecured lending and do not expect any material growth in balances. In overall terms, impairment losses are likely to show a modest increase. The increase in secured impairments (from a very low level) is expected to be partly offset by lower levels of unsecured impairments which we

believe peaked in the first half of 2007.

Corporate

Corporate asset growth will be higher in the first half year of 2008, given the strong pipeline of business. For the year as a whole, asset growth is expected to be in single digits compared to the stronger growth of recent years. Margins for new business have improved but in 2008 margins overall will be impacted by a slower churn in the back book and a changing asset mix. Some increase in impairment losses is to be expected compared to the relatively benign environment of recent years.

Insurance and Investment

In our Insurance business, we are seeing strong growth in household and motor insurance, whilst the creditor insurance markets are more subdued, partly reflecting our own lending appetite. Claims experience is expected to be more favourable than in 2007, assuming no repeat of the extreme weather events. Sales in our Investment business are inevitably being impacted by the volatile equity markets but we remain confident of the future growth in this business.

International

We continue to invest in the growth of our International businesses particularly in Australia and Ireland, balancing short term profit with the delivery of longer term growth. Our International businesses are trading well but are not immune from the dislocation in global financial markets and, again, some deterioration in the credit environment is to be expected.

Page 13

Treasury Portfolio

There have been no material changes in the composition of our Treasury Portfolio of debt securities since the year end. While there have been some credit rating downgrades, credit quality remains sound.

In the first quarter of 2008, total negative fair value adjustments through the Income Statement relating to the Trading Book totalled £970 million (full year 2007: £227 million). This reflects current market conditions including illiquidity of US Residential Mortgage Backed Securities ("US RMBS") in the form of Alt-A.

Negative fair value adjustments relating to the Banking Book totalled £1,874 million post tax for the same period (full year 2007: £509 million post tax), again reflecting additional mark-downs in respect of ABS due to current market conditions, including illiquidity. Fair value adjustments relating to the Banking Book are taken through the Available For Sale ("AFS") reserve and do not impact on profits or regulatory capital.

Following these additional mark-downs, our Alt-A and CBO portfolios are effectively marked to 80p in the £ even though they are overwhelmingly AAA rated. The weighted average rating for our CDOs was 1.03 end March 2008 (1.03 end December 2007) and 1.01 for Alt-A (1.00 end December 2007). With regard to our Alt-A book, as previously stated, the weighted average FICO score is 708, the weighted average LTV 77% and the current weighted average credit enhancement level 30%.

We expect the negative fair value adjustments taken through the Trading and Banking Books to reverse over time.

Outlook

Notwithstanding the global financial uncertainties, we expect the UK economy to prove fairly

resilient with GDP growth of between 1.25-1.5%, relatively strong employment prospects (even if consumption is weaker) and low interest rates. House prices are expected to fall, probably by mid single digits in 2008 and 2009. The capital raising announced today will provide us with financial resilience in challenging economic circumstances.

In the rest of the year, we expect asset growth to slow and margins to stabilise as pricing compensates for increased funding costs. We expect only a modest increase in impairments and will continue to drive costs out of the business. Overall, these should lead to a stronger performance in the second half.

We are focused on achieving returns on equity in the mid teens, and are well placed to deliver long term sustainable growth.

¹The Weighted Average External Credit Rating is the lower of Moody's, Standard and Poor's and Fitch using the translation: Aaa=1; Aa1=2; Aa2=3, etc.
